(C) 937.689.7590  
[waringlw@msn.com](mailto:waringlw@msn.com)

Over 30 years of leadership experience in roles of increasing responsibility. Extensive experience in supply and asset management to include policy for requirements determination and budgeting. Significant experience in managing programs, with an emphasis on propulsion programs. Experienced in both product and logistics center operations and held key position at higher headquarters. Skilled analyst.

### Principal Areas of Expertise

#### *Logistics*

Learned the basics as an inventory management specialist, the “quarterback” of the Air Logistics Center item management team. Held staff positions at the ALC and provided policy and procedures for management of reparable and consumable spare parts and support equipment. Led major command staff responsible for policy, guidance, and resources for spare parts. Managed inventory valued at over \$22 billion.

#### *Propulsion Systems Management*

Managed engine spare parts at logistics center. Led engine team as we reorganized from a functional focus to a product focus. As Director of Propulsion Systems at product center recognized need for life extensions to fighter engines. Led efforts that resulted in major modification of fighter engines.

#### *Financial Planning and Execution*

Led all Air Force stakeholders in the process of determining depot-level budget requirements for aircraft, engines, software and support equipment (DPEM (Depot Purchased Equipment Maintenance)). Office of Secretary of Defense (OSD) used process as a benchmark, referring Army and Navy to my team for assistance in how to develop a credible budget. Managed the supply stock fund, a \$2.2B working capital fund.

#### Position

Associate

#### Education

BS, Math Education  
Edinboro University  
MBA, Management  
University of Texas  
Air Command and Staff College  
Program Manager's Course  
Defense Systems Management  
College (DSMC)
